If you have any questions about this Notice, please contact Kacie Whitehead, Privacy Officer, at (541) 851-8110 or by mail at 2074 South 6th Street, Klamath Falls, OR 97601.

PURPOSE – Klamath Health Partnership (KHP) is committed to protecting your protected health information, and we encourage you to contact our Privacy Officer should any issue or question arise. This Notice of Privacy Practice ("Notice") describes the processes our staff follow to protect your protected health information (PHI). We are required by law to give you this Notice. This Notice explains how and when we may use or disclose your PHI but may not include every possible situation. This Notice describes your rights and our responsibilities regarding the use and disclosure of PHI.

YOUR HEALTH INFORMATION – This Notice applies to the information and records we have about your health, health status, and the health care and services you receive at KHP. Your health information may include information created and received by this office, may be written or electronic records or spoken words, and may include information about your health history, health status, symptoms, examinations, test results, diagnoses, treatments, procedures, prescriptions, related billing activity, and similar types of health-related information.

HOW WE MAY USE AND DISCLOSE HEALTH INFORMATION ABOUT YOU – We may use and disclose health information without your consent:

For Treatment. We may use your health information to provide you with treatment or services. We may disclose health information about you to doctors, nurses, technicians, office staff or other personnel who are involved in your care. Staff in our office may share information about you with people who do not work in our office to coordinate your care, such as phoning in prescriptions to your pharmacy or ordering lab work or imaging studies. Family members and other healthcare providers may be part of your medical care outside this office and may require information about you that we have.

We may also disclose your health information to health plans that provide you insurance coverage and other health care providers that care for you. Our disclosures of your health information to plans and other providers may be for the purpose of helping these plans and providers provide or improve care, reduce cost, coordinate and manage health care and services, train staff, and comply with the law.

For Payment. We may use and disclose health information about you to bill for the treatment and services you receive from us and to collect payment from you, a health plan, or another third party. We may tell your health plan about a treatment you are going to receive to get prior approval, or to determine whether your plan will pay for the treatment.

For Health Care Operations. We may use and disclose PHI to run or improve our office, programs, or services, and make sure that you and our other patients receive quality care. For example, we may use

your health information to evaluate the performance of our staff in caring for you. We may also use health information to help us decide which additional services we should offer, how we can become more efficient, or whether certain new treatments are effective.

Appointment Reminders. We may use and disclose PHI to contact you to remind you about appointments for treatment or health care.

Treatment Alternative/Health-Related Benefits and Services. We may use and disclose PHI to contact you about or recommend possible treatment options or alternatives or health-related benefits and services that may be of interest to you.

To Avert a Serious Threat to Health or Safety. We may use and disclose your PHI when necessary to prevent a serious threat to your health and safety or the health and safety of the public or another person. We will only disclose PHI to someone who may be able to help prevent the threat.

Required By Law. We will disclose health information about you when required to do so by federal, state, or local law. We may disclose PHI in response to a court order.

Research. We may use and disclose PHI for research projects that are subject to a special approval process. We may use and disclose a limited data set that does not contain specific identifiable information about you for research. We will only disclose this limited data set if we enter into a data use agreement with the researcher. We will ask you for your permission if the researcher will have access to your name, address, or other information that reveals who you are or will be involved in your care at the office.

Organ and Tissue Donation. If you are an organ donor, we may release your PHI to organizations that handle organ procurement as necessary to facilitate such donation and transplantation.

Military, Veterans, National Security, and Intelligence. If you are or were a member of the armed forces, or part of the national security or intelligence communities, we may be required by military command or other government authorities to release your PHI. We may also release information about foreign military personnel to the appropriate foreign military authority.

Inmates. We may disclose your PHI if you are an inmate of a correctional institution or under the custody of a law enforcement official to such agencies if the disclosure is necessary for the institution to provide you with health care, protect your health and safety or the health and safety of others, or the safety and security of the correctional institution.

Public Health Risks. We may disclose health information about you for public health reasons in order to prevent or control disease, injury or disability; or report births, deaths; suspected abuse or neglect;

non-accidental physical injuries; reactions to medications or problems with products; a person who may have been exposed to a disease or may be at risk for contracting or spreading a disease or condition.

These disclosures may be necessary for certain state and federal agencies to monitor the health care system, government programs, and compliance with civil rights laws.

Information Not Personally Identifiable. We may use or disclose health information about you in a way that does not personally identify you or reveal who you are.

Family and Friends. We may disclose health information about you to your family members or friends if we obtain your verbal agreement to do so or if we give you an opportunity to object to such a disclosure and you do not raise an objection. We may also disclose health information to your family or friends if we can infer from the circumstances, based on our professional judgment, that you would not object. In situations where you are not capable of giving consent because you are not present or due to your incapacity or medical emergency, we may, using our professional judgment, use or disclose to your family member or friend if in your best interest. In that situation, we will disclose only health information relevant to the person's involvement in your care.

Data Breach Notification. We may use or disclose your PHI to provide legally required notices of unauthorized access to or disclosure of your health information. You have the right to know of a breach of any of your unsecured PHI.

OTHER USES AND DISCLOSURES OF HEALTH INFORMATION – We will not use or disclose your health information for any purpose other than those identified in the previous sections without your specific written authorization. If you give us the authorization to use or disclose health information about you, you may revoke that authorization, **in writing**, at any time. If you revoke your authorization, we will no longer use or disclose information about you for the reasons covered by your written authorization, but we cannot take back any uses or disclosures already made under your permission.

YOUR WRITTEN AUTHORIZATION IS REQUIRED FOR OTHER USES AND DISCLOSURES – The following uses and disclosures of your PHI will only be made with your specific, written authorization:

This is a list of the disclosures we made of medical information about you for purposes other than treatment, payment, health care operations, and a limited number of special circumstances involving national security, correctional institutions, and law enforcement. The list will also exclude any disclosures we have made based on your written authorization. To obtain this list, you must submit your request in writing to our Privacy Officer. The first list you request within a 12-month period will be free. We may charge you for the costs of providing additional lists. DENTAL TREAMTMENT CONSENT

PHASES OF DENTAL TREATMENT

Klamath Health Partnership strives to provide all patients with the best care possible. Dental care at KHP is separated into phases. These phases are ordered to ensure the success of your treatment. You must fully finish one phase before starting the next phase of treatment. You will be provided with a custom treatment plan for your care, which may change as treatment progresses. Dental treatment at KHP is phased as follows:

Urgent Care: We strive to address any dental emergencies as soon as possible. Patients may seek limited treatment for painful oral conditions before establishing a comprehensive treatment plan. This treatment is limited in scope and patients are encouraged to return for a thorough dental examination. **Urgent treatment may include extraction of teeth, fillings, denture adjustments, initial root canal therapy, or other palliative care.**

Phase 1: Comprehensive Exam: Your oral health is critical to your overall health. It is important that your dental provider be thoroughly informed of your medical history and any past or present medical conditions. Your current medications will be reviewed. Your dentist may consult with your medical provider. A thorough examination of your teeth, mouth, and head/neck will be completed. **Any necessary radiographs will be taken during this phase of care. Current radiographs can be requested from a previous dental office; but other radiographs may still need to be taken. You will be presented with a treatment plan that addresses your oral health needs at the end of the appointment.**

Phase 2: Disease Control: Your dental provider will treat any active disease in your mouth. The two most common diseases in the mouth are dental decay (cavities) and gum disease. **Common treatments are cleanings, oral hygiene instruction, fillings, extraction of teeth, and root canal treatment.**

Phase 3: Major Repair or Replacement of Teeth: After your dental provider has stabilized any dental disease and has helped you maintain a healthy mouth, treatments to address significant dental issues may begin. **These treatments may include crowns, bridges, partial or complete dentures, veneers, implants, and orthodontics.**

Phase 4: Maintenance. After restoring your teeth and gums, maintenance is important to keep your mouth healthy. Your maintenance treatment plan will be based on your specific oral health needs. **Treatments in this phase might include cleaning, fluoride treatment, annual exams, or brushing and flossing instructions.**
